

THE FUTURE OF ACCOUNTING AT YOUR FINGERTIPS

- Integration with most present accounting software
- Streamlining the Supply chain
- Immediate financial savings for businesses

The business model is profitable for all parties involved:
- the accounting software firms, the businesses along the supply chain due to great savings, the consumer, and AB.

THE ACCOUNTING BLOCKCHAIN

10s of trillions of business to business accounting transactions must be recorded every year. Now double this! Why? Every transaction must be recorded by the sending and the receiving party independently of each other!

The cost of this? **Billions of dollars** are spent each and every year because there is no trusted common ground to connect businesses along the supply chain. The accounting blockchain will allow the integration of triple entry and smart contracts tailor made to fit the current market of accounting software packages.

The development of The Accounting Blockchain revolutionizes both the way companies invoice each other and the way payments are done along the supply chain all the way to the end consumer. The cost of AB Tokens would be just a fraction of the savings companies will start enjoying immediately!

AB FINGERTIPS SUITE

AB Fingertips suite is the way forward for businesses wanting to integrate into the supply chain through blockchain and to introduce the **future way of doing business through crypto currencies** effortlessly into their current business model and accounting practice.

AB Fingertips Suite provides a perfect marriage of the traditional FIAT currencies, smart contracts, and crypto currencies.

AB Fingertips Suite introduces a viable way to have **triple entries** that automatically connects businesses in their transactions. An accounting software platform **built around the triple entry concept**. AB fingertips Suite provides an effortless integration of blockchain technology into the way business is done today.

AB TAXAVANCE

Ab Taxavance is a really easy to use platform that keeps track of your trades and their tax implications. A platform with tax parameters fed by a global network of tax experts that is able to **work out in real time the tax exposure of your crypto trades**

and collaborators at your fingertips. Pre-trading information including trade simulations to make proactive decisions. Keeping record of your trades and their current tax exposure should you buy more, hold, or sell. Issuing end-term tax reports of your trades and investments. APIs with exchanges, and AI assisted report input that may read reports from exchanges and setting up a common protocol to interface with exchanges. **A true global 24/7 tax assistant.**

TEAM LEADERS
